

PRESS RELEASE

September 2001

*Nature
in a game box
for little Earthlings!*

- 1 to 4 players
- Ages 3 and up

**Bioviva is pleased to announce the introduction of
“My First 3 Nature Games” :**

**Open this fabulous box and introduce children to the living world.
Each of the 3 drawers holds a stimulating game that leads children on
a discovery tour of Nature. Three surprising adventures await them:**

How are animals born? What do they eat?

How do they protect themselves?

Children, and parents, will be delighted to discover Bioviva’s new twist on the old favorites of **Dominoes**, **Memory Cards** and simple **Board Games**.

Presented in a handy, 3-drawer storage box, these colorful, attractive games lead children on a discovery tour of Nature while helping them to develop essential learning skills: visual recognition, observation and memory.

Tested with success in pre-school classes, “**My First 3 Nature Games**” has been received enthusiastically by children and educators alike. These fun, educational, co-operative play games are a unanimous success.

Each game includes additional explanations for parents who want to know it all and to satisfy the curiosity of their offspring!

Educational support will soon be available on Internet (www.bioviva.com) to enable parents and educators to go even further in their discovery of the living world.

My First 3 Nature Games is distributed in Australia & NZ by **Divisible by Zero**
(03) 9388 9902

More information at www.dbz.com.au

Does your child know that crocodiles lay eggs and then watch over them, without eating, for 80 days?

While playing **Baby Animals Memory**, the living world reveals itself to your child. The illustrated explanations guide your child in differentiating between animals that lay eggs and those that don’t!

Does your little one know that hedgehogs find earthworms very appetising? Who’s Afraid of the Fox

introduces your child to the role of wild animals in the food chain. Which animal, the hedgehog or the rabbit, will be the first to gobble up the big apple? To find out, play the game, but keep an eye out for the fox!

Does your youngster know that some animals hide while others show off to defend themselves against predators?

As your child puts together the **Hide and Seek Dominoes**, he/she will discover various animal defense mechanisms: camouflage, mimicry, spines, shells, etc.

My First 3 Nature Games is made from recycled materials and is recyclable.
Made in Canada.
