

# NOTEBOARD

The Ultimate Laptop Accessory

FROM

Full size standard 104 keyboard provides full functionality and ease of use

Adjustable feet enable the keyboard to be elevated above the laptop.

Wrist rest provides support while typing.

Feet height can be selected to enable the keyboard to sit flat, or to be elevated at the rear.

## The only full-sized keyboard for notebooks!

# NOTEBOARD

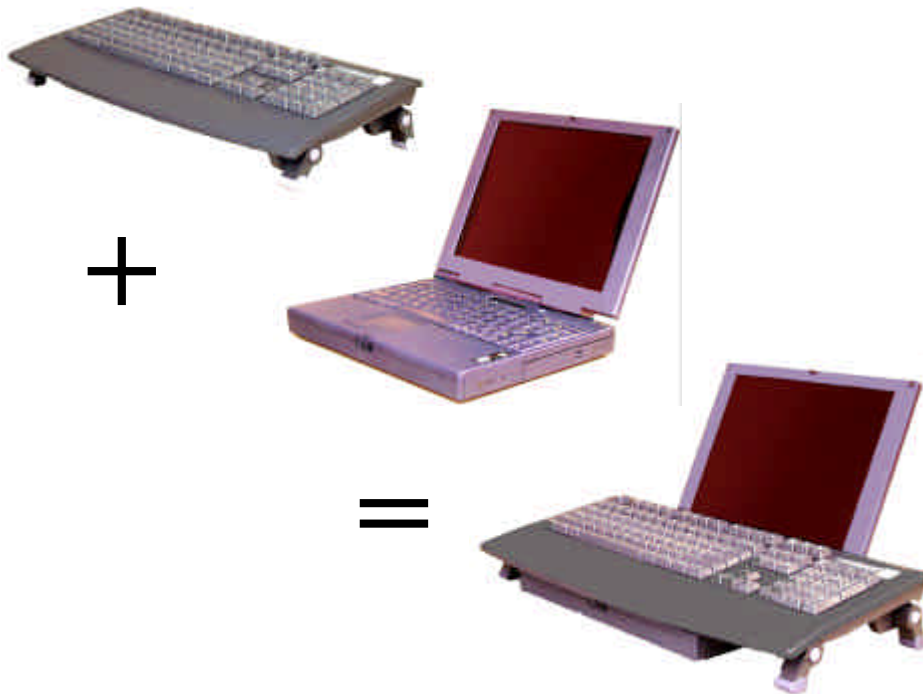

If you love the portability of your notebook, but hate its cramped keyboard, the NoteBoard is the answer!

The NoteBoard's adjustable feet allow you to position the NoteBoard directly over your notebook's keyboard, while its comfortable built-in wrist rest provides extra support.

With the NoteBoard, you get the feel of a desktop without the expense of a docking station. The NoteBoard works with ALL PC-compatible notebook computers. It's the perfect add-on to your notebook or laptop system!

"Of all the keyboards I have used, I found Datadesk's to be the smoothest and easiest to work with."

### Infoword

"(The **NoteBoard**) is a full-size (yes, all 104 keys!) Windows keyboard, specifically designed for use with portable computers. The keyboard has a very comfortable and capacious wrist rest area. For this reviewer, typing was a very pleasurable experience."

### PC Laptop Magazine

"The **NoteBoard** stands directly over a notebook's keyboard....to provide everything you are used to having in a full-size keyboard."

### The London Times

To reclaim desk real estate normally usurped by peripherals and a docking station connected to a notebook, the company introduced at Comdex last week the **NoteBoard**, a full-sized keyboard designed with adjustable feet to fit over a notebook's embedded keyboard."
