FINALLY, AN OPAQUE "PEEK PROOF" SOLUTION TO KEYBOARD INSTRUCTION

Opaque orange **SPEEDSKIN** or **i-SKIN** covers placed on the keyboard require the student to type by touch. No more keyboard peeking! Your students will quickly recognise the benefits of **SPEEDSKIN** and **i-SKIN** when using any keyboard instruction program. Order **SPEEDSKIN** or **i-SKIN** covers for your computer lab or classroom today and improve your students' keyboard speed and accuracy.

Both **SPEEDSKIN** and **i-SKIN**

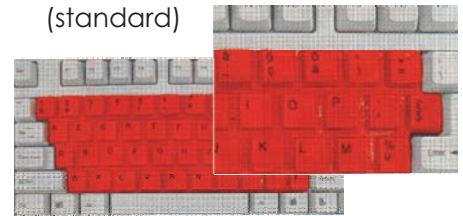

- ▶ Requires students to concentrate on touch typing
- ▶ Covers only letter, number and punctuation keys
- ▶ Easily lift on and off the keyboard in one step
- ▶ Home row indicators
- ▶ Bright orange for easy classroom visibility
- ▶ Come with clear plastic storage tray
- ▶ Can be used with any keyboard instruction software or text book
- ▶ **SPEEDSKIN** has dotted cutting line for use with split ergonomic keyboards.

C-SKIN UNLOCKS THE FOREIGN LANGUAGE POWER OF YOUR COMPUTER

Did you know that a foreign language can easily be added to your desktop? And that with the click of a mouse, you can toggle between English and any language you choose? There are about 64 languages in your Windows® operating system and 22 in your Apple® operating system!

(Product insert provides instructions for selecting foreign languages from the operating system and adding them to your PC or Apple desktop)

With **c-SKIN**, you can easily convert your computer keyboard from one language to another. Just place a **c-SKIN** on your keyboard that matches the language chosen from your operating system.

You are now ready to:

- ▶ Teach language and writing proficiency
- ▶ E-mail and correspond with family and friends in their primary language.
- ▶ Conduct business in other languages

Take an English one when you go overseas to make using foreign internet cafes easier!

All this **without** changing keyboards and rebooting for each language change!

C-SKIN UNLOCKS THE READING READINESS POWER OF YOUR COMPUTER

Do your early readers tell you: "I don't have an 'a' on my computer?" Do the keyboard capital letters confuse your early readers looking for lower case "a, b, g, j, i, l" and other letters? **c-SKIN** imprinted with upper and lower case letters gives reading readiness power to your computer keyboard.

- ▶ Accelerates upper/lower case letter recognition for all K-3 early readers (aA, bB, gG, jJ, il, etc)
- ▶ Aides special needs students in upper/lower case letter recognition
- ▶ Accelerates English as a Second Language (ESL) students alphabet mastery
- ▶ Aids teaching English to foreign students
- ▶ Makes using internet cafes while traveling overseas so much easier!

Learning Technology co-ordinators, share this information with your language and reading readiness teachers
